DETAILED ACTION

Response to Amendment

1. This office action is in response to the amendment filed on October 22, 2002 in which applicant amends claims 11, 13, 15, 21, 22, 24, 31, 32, and 35; amends the abstract; and responds to the claim rejections.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Wells (U.S. Patent Application Publication U.S. 2002/0115487 A1).

Wells discloses a gaming device network comprising a method and apparatus for permitting communications with a gaming device. In one embodiment of the invention, the invention comprises a network including a host or gaming gateway and a communication interface associated with each gaming device on the network. A communication link is provided between the gaming gateway and the gaming devices. The gaming gateway and communication interfaces are arranged to bi-directionally transmit and receive data over the communications link. In one embodiment, the communications link is an optical communications link.

Furthermore, the network comprises a host communication device capable of transmitting and receiving data, at least one gaming device, a communication interface associated with each gaming device, and a communication link provided between each one gaming device and the host communication device, the communications link comprising at least one optic fiber, the host communications device and each communications interface associated with a gaming device configured to bi-directionally communicate data over the communication link. In one embodiment, an optic fiber extends from the gaming gateway to a first gaming device. Another optic fiber extends from the first gaming device to the next gaming device. Another optic fiber extends from the last gaming device back to the gateway. A network loop topography is formed. Furthermore, applicant's invention essentially adheres to IEEE's Standard for a High Performance Serial Bus-1394-1995 (Abstract, Figures 1-4, and Paragraphs 18-26).

Response to Arguments

4. Applicant's arguments with respect to claims 1-36 have been considered but are moot in view of the new ground(s) of rejection.
5. Applicant overcomes the objection to the abstract with the amendment. Therefore, the objection is withdrawn.
6. Applicant overcomes the rejections to claims 11, 21-22, 32-33, and 35 with the amendment. Therefore, the rejection is withdrawn.
